ICE Conditions of Contract Target Cost Version

ICE, ACE and CECA

This publication encourages active collaboration to reduce costs by sharing expertise and jointly managing risks in an open working environment, within the framework of the ICE Conditions of Contract family.

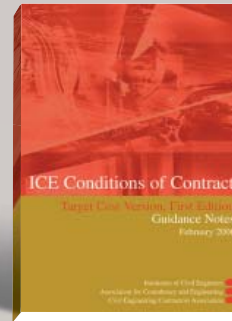

It encourages the Contractor to be more closely involved in aspects of design, provides for payment to the Contractor on a cost reimbursable basis and an incentive share arrangement if the costs differ from the target.

A more open style of control and management, which permits an early and joint approach to the identification and management of risks, obliges parties to recognise and understand each other's objectives and promotes closer working relationships.

ICE Conditions of Contract Target Cost Version : Guidance Notes

ICE, ACE and CECA

This publication provides guidance to the ICE Conditions of Contract Target Cost Version 1e.

Contents

- Introduction
- Contract documents
- Overall concept
- Choice of Target Cost Contract
- Matters for the Employer to decide during the preparation of the Tender Documents
- Tendering and Contractor Selection
- Award of the Contract
- Operation of the Contract
- Engineer's role in a Target Cost Contract
- Notes on specific Clauses
- Appendix 1. Bond
- Appendix 2. Worked Example
- Appendix 3. Proforma
- Appendix 4. Retentions

ICE Conditions of Contract Ground Investigation Version

2nd edition

ICE, ACE and CECA

Like the Measurement Version of the ICE Conditions of Contract, the Ground Investigation Version is based on the traditional pattern of an investigation designed by an Engineer and carried out by a Specialist Contractor. These Conditions are intended for the situation where the Employer wishes to develop a site and has geotechnical specialists to advise him and who will carry out any initial desk study, identify the geotechnical requirements of the project and design a ground investigation to suit those requirements.

ICE Conditions of Contract for Archaeological Investigation

ICE, ACE, CECA and IFA

An Archaeological Investigation is usually undertaken to provide information:

- in response to a proposed development which could cause damage to Archaeological Remains
- as part of the planning process (within the framework of appropriate national planning policy guidance notes) and/or development plan policy
- as part of an Environmental Impact Assessment.

Where the Investigation finds Archaeological Remains they are recorded, analysed and interpreted and the findings disseminated as appropriate.

These Conditions of Contract regulate the business relationship between the Employer and the specialist Archaeological Contractor during the course of an Archaeological Investigation. The Contract retains a pattern traditional in civil engineering contracts, with an investigation commissioned by an Employer, designed or approved by an Engineer and carried out by a specialist Archaeological Contractor, only that the term 'Consultant' is used instead of 'Engineer'.

ICE Conditions of Contract Partnering Addendum

ICE, ACE and CECA

This partnering addendum aims to deliver an effective and flexible mechanism for multi-party partnering using ICE Conditions of Contract, ACE Agreements 2002 and CECA Forms of Subcontract. The document governs the implementation of the partnering arrangement and the relationship between the Partners. It may include any documents that are applicable to all parties (e.g. code of conduct) and may include any requirements for:

- use of common information systems, sharing of offices
- attendance at Partners' and Core Group meetings
- participation in partnering workshops
- arrangements for joint design development
- value engineering and value management
- risk management
- joint performance management and monitoring, including compliance measurement.

The Practical Guide to Waste Management Law

R. G. P. Hawkins FCIWM FRGS FRSA, *International Environmental Lawyer*

H. S. Shaw BEng PhD, *Gifford & Partners and School of Civil Engineering & the Environment, University of Southampton*

www.thomastelford.com

“This is the start of an enormous change in waste – both a challenge and an opportunity”

John Burns, Waste Implementation Programme Director, DEFRA

The commercial and environmental effects of new laws and practices are explained in this best selling book with references to relevant websites to aid the reader to find further details and solutions to environmental difficulties which will be the responsibility of the Environment Agency, SEPA, Local Authorities, the Health and Safety Executive, the Vehicle Operator Services Agency, Customs and Excise and other named agencies.

In December 2005 Richard Hawkins was awarded the Medal of the President of the Chartered Institute of Waste Management for his contributions to international waste management standards and for this practical guide.

CONTENTS

- The historical background
- Defining waste
- Waste classification
- The administration and management of waste
- Waste minimisation, recycling, bioprocessing and recovery
- Energy recovery, incineration and landfill
- The planning system and structural reform
- Integrated pollution prevention and control and the permitting regime
- Environmental, criminal, and civil law simplified and the control of fly-tipping
- Health & safety, the duty of care regulations and basic contractual considerations
- The consignment and movement of waste
- Waste mismanagement and water quality
- The end of the beginning
