

Offshore Engineering Society

Launched Jackets

Wednesday 10th October 2018, Institution of Civil Engineers

18:00 (refreshments available from 17:30)

One Great George Street, Westminster, London SW1P 3AA

Speaker: Paul Corry, Project Engineer, Heerema Marine Contractors

Offshore Oil and Gas Launch Jackets. What are they? Why have they re-appeared in the North Sea? What is the consequence of this installation methodology and how do installation contractors install Jackets in excess of 28,000 mT?

This presentation will give a high-level overview of launch Jackets within the North Sea but will primarily focus on key aspects/parameters the installation contractors have to control the operation, with examples from a recent launch Jacket.

SPEAKER

Paul Corry, Project Engineer, Heerema Marine Contractors

Paul is both a Chartered Engineer, with the IMarEST and a Chartered Project Manager, with the Project Management Institute (PMI) working for Heerema Marine Contractors, in London.

Paul has experience working on numerous offshore installation projects and has worked on 4 launch Jackets, within the North Sea. Before joining Heerema, Paul worked for several leading offshore companies working on both Subsea and Renewable offshore installations. Paul read Civil and Environmental Engineering at Imperial College, London.
