

**Institution of Civil Engineers, Hong Kong Association
Committee election, session 2024-2025
Candidate biography and platform statement**

1. Mr HO, Ying Kit Tony (FICE)

Biography

Mr Tony Ho has obtained his BEng degree from The University of Hong Kong and MSc degree from The Imperial College London. He is now with the Development Bureau and oversees policies on public works procurement, including promotion and application of NEC in Hong Kong. He is a Fellow of the Institution of Civil Engineers (ICE) and the Institution of Hong Kong Engineers (HKIE). He has been practising in the field of civil and geotechnical engineering for over 25 years, with rich experience in managing multi-disciplinary projects. His expertise covers a wide spectrum of technical aspects, including landslide risk management, slope engineering, cavern development, site formation and excavation, ground investigation and laboratory testing, as well as remote sensing. Tony has been actively participating in the professional services, including the HKIE and Engineers Registration Board (ERB). He was the Chairman of the HKIE Geotechnical Division in Session 2021/2022. He is also serving in the International Tunnelling and Underground Space Association Committee on Underground Space (ITACUS) as an Advisory Board Member.

Platform statement

The construction industry is full of ongoing challenges. There has been no lack of solutions, only it demands cohesive effort to champion changes and coordinate the diverse expertise to meet the challenges. With passion and enthusiasm, I have been partnering seamlessly with different professionals to work on this front. I have actively engaged in promoting civil engineering profession to the younger generation and enhancing the standing of civil engineers in the realms of innovation applications and ESG performance. If elected, I will make further efforts to promote technical excellence and nurture young talents to shape the future of our city.

2. Mr LEE, Pui Sang Leo (MICE)

Biography

Leo is a Chartered Civil Engineer with a wealth of experience in the industry. With a strong passion for civil engineering and a commitment to promoting the profession, Leo has played a vital role in various infrastructure projects throughout his career. As a seasoned professional, he has successfully overseen critical projects, demonstrating expertise in planning, design, construction, and contract administration, particularly for projects of main building and drainage works. Leo is currently a Project Coordinator at the Drainage Services Department.

Leo holds a Bachelor of Engineering (BEng) in Civil Engineering from McMaster University, currently pursuing a Master of Science (MSc) in Civil Infrastructural Engineering and Management at the Hong Kong University of Science and Technology. Leo's professional qualifications and certifications include Chartered Engineer status, NEC4: ECC Project Manager Accreditation, and membership in the Institution of Civil Engineers, UK.

Leo's dedication to the profession extends beyond his day-to-day work. He has actively contributed to the Outreach Subcommittee of the Institution of Civil Engineers Hong Kong Association (ICE HKA), where he has been involved in organizing events to promote civil engineering and engage with the wider public.

Platform statement

My mission is to leverage my extensive civil engineering experience to promote the profession and drive its growth in the local community. Recently I have been assisting the Outreach Subcommittee of ICE HKA in outreach activities. By fostering collaboration between industry professionals, educational institutions, and the public, I aim to raise awareness, inspire future engineers, and advocate for sustainable infrastructure development. Together, we can build a stronger and more resilient future for Hong Kong through the power of civil engineering.

3. Mr SOOTOO, Francis Nyuk Luan (FICE)

Biography

Mr. Sootoo, (FICE, FCHIT, FCILT, FHKIHT, MICE) is a Vice-President, Consulting Business, Systra Asia and Board Director, MVA HK+Asia with wide-ranging international experience in traffic engineering, transport planning and project management of large-scale government and private sector projects (Railway & Transport Infrastructure Planning and TOD mix-used development) acquired in HK, China & overseas. Prior to joining MVA in 1994, he was a public servant in the Conservation & Planning Department of Royal Borough of Kensington & Chelsea, London.

He is a professor-level Senior Engineer of the Highway Engineering of the Guangdong Institution of Engineers & Guangdong Province Highway Society, PRC and currently serves in the following Public Services, Institutions and Trade Chambers:

- Vice Chairman, The Institution of Public Private Partnerships and International, Belt & Road Committee, China Real Estate Chamber of Commerce HK & International
- Council Member, HK Trade Development Council - Service Promotion Programme Committee; HKIE Logistics & Transportation Division; and HK Institution of Highways & Transportation
- Co-opt Member, Association of Consulting Engineers HK
- Member, HKIE LTE Discipline Advisory Panel & HKIE Training Review Sub-Committee (GPIII)
- Member, Appeal Tribunal Panel (Building Ordinance S45.Cap 123), Planning & Lands Branch, DevB, HKSARG
- Industrial Advisor, Intellectual Property Assessment Committee HK Polytechnic University

Platform statement

I am delighted to participate in the ICE HKA committee election for the session 2024-25 as a potential candidate.

My active engagement in serving the various professional and trade associations, institutions, councils, and public services had given me the experience in serving the council and our striving industry, if elected.

In the past years, I have been actively promoting HK infrastructure development and our engineering professionals in overseas missions and countries along the Belt & Road corridors.

I will continue to actively promote the professionalism of ICE and support the professional development of our future generation engineers and leaders.

4. Mr WEI, Ray Xiejin (MICE)

Biography

Ray Xiejin WEI, is a Senior Project Manager of China State Construction Engineering (Hong Kong) Limited. With 14 years of solid working experience in Hong Kong, Macau and North Africa. He has overseen diverse projects including tunnel, foundation, reclamation and road & drainage works. He collaborates with reputable entities such as Hong Kong Airport Authority, MTRC and Highways Department. Ray, leading his team, delivered mega projects including Central-Wan Chai Bypass Tunnel, Exhibition Center Station and Western Approach Tunnel, Three-runway System of Hong Kong International Airport which reshaped Hong Kong's transportation and logistics network.

Ray serves as an observer of ICE HKA during session 2023/2024. He actively supports ICE HKA activities in organizing technical site visits and providing resource to support kinds of events.

Platform statement

I am privileged to have the chance to promote the ICE HKA and serve the industry of engineering and construction. Given my background and current resources, if elected, I will focus on the following aspects:

- Enhancing the communications between the ICE HKA and profession institutions in Mainland China
- Supporting engineering and construction experience exchanging within the Greater Bay Area
- Promoting professional development of young engineers from construction industry
- Encouraging sustainable development in infrastructural and construction projects

5. Mr WONG, Ham Kwan Anthony (MICE)

Biography

Anthony Wong is an accomplished Senior Engineer at AECOM, having earned various accolades since graduating from Imperial College London in 2015. His notable achievements include the title of Champion of the ICE Communications Competition, recognition as the President's Protégé of the HKIE, and the prestigious HKIE Innovation Award. Additionally, Anthony was nominated to Hong Kong Young Leaders Programme in 2022 and LTA Leadership Training Course in 2023, building connections with motivated individuals from various fields. Currently, Anthony is pursuing a part-time PhD degree at the Hong Kong University of Science and Technology, focussing on the sustainable development of land reclamation.

Aside from work, Anthony is highly motivated to make a positive impact. Since 2021, he has served as the Vice Chairperson of ICE Caring Engineering (ICarE), a platform that offers voluntary engineering services to underprivileged communities in South-east Asia. In this role, Anthony has been instrumental in driving business development, overseeing projects from conception to execution, and mobilising volunteers from different civil engineering disciplines. His notable contributions include the installation of solar lights at Hung Shui Kiu squatters, the construction of biopores at Pok Fu Lam village, and the organisation of STEM workshops tailored for students with special educational needs.

Platform statement

I am committed to elevating the public perception of civil engineers by fostering interdisciplinary and cross-profession activities. Expanding upon my current role as Vice Chairperson of ICE Caring Engineering (ICarE), I aim to actively promote collaboration that transcends professional boundaries and unite individuals from diverse backgrounds to address societal challenges. Combining my enthusiasm with my repertoire of experiences in leading charities and collaborating with international organisations, I am confident that I can bring spark and innovation to ICE HKA. With my dedication and your vote, I eagerly await the opportunity to drive the future of ICE. Thank you.
