

ICE East Midlands Knowledge and Networking Committee: Keeping people in the Fens region dry and productive

Join the ICE East Midlands Knowledge and Networking Committee for a presentation on the Fens 2100+ partnership project and how it aims to secure a climate resilient future for the Fens.

The Fens is one of the most distinctive landscapes in the UK. Once a natural marshland, it has become one of the most productive agricultural regions in the UK.

Being below sea level the water in the Fens must be constantly managed to ensure there is enough water for agriculture, while also draining water off the landscape in heavy rain.

Fens 2100+ is a partnership involving:

- Environment Agency
- Association of Drainage Authorities
- Internal Drainage Boards
- Local authorities
- National Farmers Union
- Anglian Water
- Natural England
