

Conservation Accreditation Register of Engineers

October 2023

What is a Conservation Accredited Engineer?

The Conservation Accreditation Register of Engineers (CARE) identifies civil and structural engineers skilled in the conservation of historic structures and sites. Conservation Accredited Engineers have gone through a rigorous procedure to confirm their range of knowledge of old buildings and their understanding and empathy with the conservation philosophy and methods applied to heritage projects.

Why should Conservation Accredited Engineers be used on heritage buildings and structures?

Most engineers are trained to design modern buildings using modern materials. By contrast, Conservation Accredited Engineers have broadened their experience to include an extensive knowledge of the use, behaviour and, most importantly, the degradation of the materials used in historic buildings. This gives them a superior insight into the problems which may develop in old buildings and it allows them to develop solutions which cause the minimum of disruption to the building fabric.

The most recent version of the CARE Register can be downloaded from the ICE website [here](#).

As conservation engineering is a specialism, most Conservation Accredited Engineers cover a large area and indeed many work countrywide. If you are located at a distance from the nearest registered engineer, your need is small and your timescale flexible an engineer on the register might be able to tie in visiting your property with something else they are visiting nearby, rather than undertaking a specific visit.

The registrants base has been colour coded as follows to assist with identifying engineers nearby. **Ireland, Scotland, Wales, England: North West, North East, Yorkshire & Humber, West Midlands, East Midlands, East of England, South West, South East, London.** Note: English Regions are as defined in January 2023 by the [Office for National Statistics](#).

E: care@ice.org.uk
W: ice.org.uk/care

Institution of Civil Engineers is a Registered Charity in England & Wales (no 210252) and Scotland (SC038629).

Our vision

Civil engineers at the heart of society, delivering sustainable development through knowledge, skills and professional expertise.

Core purpose

- To develop and qualify professionals engaged in civil engineering
- To exchange knowledge and best practice for the creation of a sustainable and built environment
- To promote our contribution to society worldwide

Diversity statement

As a membership organisation and an employer, we value diversity and inclusion - a foundation for great engineering achievement
