

ICE Yorkshire & Humber and CIWEM

5th Annual Flooding and Water Quality Conference

12 November 2026, Hilton Leeds Central

Sponsorship and Exhibitor Overview

After four successful years, the fifth Yorkshire and Humber ICE and CIWEM Flooding and Water Quality Conference returns on the 12 November 2026 at Hilton Leeds Central.

Yorkshire and Humber benefits from a range of landscapes derived from a unique combination of major topographical and underlying geological features. These are home to a population of just under 6m people, and face both a growing need for different land usages and ever-increasing threats from climate change.

The water industry has never been so challenged as it is now, facing deteriorating asset health, low public support, and severe penalties, whilst they battle increasing challenges from climate change and investment scrutiny. This is the time that industry experts, clients, regulators, and policy makers are putting aside their individual lenses to come together in addressing a common challenge.

It is within this spirit and around this exciting opportunity, that we bring together practitioners, experts, public voice and our future generation of civil engineers from the Yorkshire and Humber region. The region continues to grow, with over 5000 civil engineering members, from across the different membership grades.

We are committed to providing professionals and civil engineers access to continuous professional development and networking opportunities. We are seeking sponsors and exhibitors for the 2026 event, see below table for details.

Sponsorship and Exhibitor opportunities
