## Online Event

# ICE Malaysia: Membership Information Session

This session is designed to encourage and inspire new members to join the Institution of Civil Engineers (ICE) by providing a clear understanding of the membership pathways, benefits, and registration process. Attendees will gain insights into how ICE membership can support their career growth, professional recognition, and networking opportunities within the engineering industry. The session will also serve as a platform to address any questions potential members may have about ICE, ensuring they have the information and confidence needed to take the next step in their professional journey.

The session will begin with a brief introduction to ICE Malaysia, highlighting its role in supporting engineers and the value it offers to aspiring members. This will be followed by an overview of ICE membership categories, explaining the different grades of membership, their eligibility criteria, and the benefits they provide at various career stages. To assist attendees in navigating the registration process, the session will include a step-by-step guide to joining ICE, covering key requirements, the application process, and useful resources for a smooth transition into membership.

To ensure participants have the opportunity to clarify any doubts or seek further guidance, the session will conclude with a Q&A segment, where attendees can ask questions about ICE membership, career progression, and professional development opportunities. This event will be hosted by the Professional Development Team of the ICE Malaysia Graduate Network and aims to equip aspiring members with the knowledge and motivation

### Speaker:

Mark Omar Mohsen / MIEAust, GMICE, Grad.IEM  
MDS Traffic Planners & Consultants / Chairman of ICE Malaysia Graduate Network

Mark is a Project Manager with MDS Traffic Planners & Consultants, bringing seven years of experience in transport planning and engineering. He holds a degree in Civil Engineering and possesses strong skills in problem-solving, traffic modelling, transport analysis, and planning. Throughout his career, he has worked on projects in Malaysia and Australia, contributing to a diverse range of transport initiatives.

One of Mark's key projects includes his research and presentation on the XT Junction Design, exploring innovative intersection improvements to enhance urban mobility. In addition to his professional role, Mark serves as the Chairman of the ICE Malaysia Graduate Network, where he actively promotes professional development, networking, and knowledge-sharing among early-career engineers. He is also a Co-opted Member of the Highway and Transportation Engineering Technical Division (HTETD) of IEM.
