

## Large Project Award 2021 Manchester Metrolink - Trafford Park Line

Transport for Greater Manchester, Aecom, MPT

A very impressive scheme. It was delivered seven months ahead of schedule, despite the challenges of the urban environment.

Extensive use of BIM meant all stakeholders could collaborate more effectively. A clear focus throughout also delivered on efficient and sustainable solutions.

Its true impact on society is yet to be realised, but it is undoubtedly an asset to be proud of and a very worthy winner of the Large Project Award.
